03

Fashion

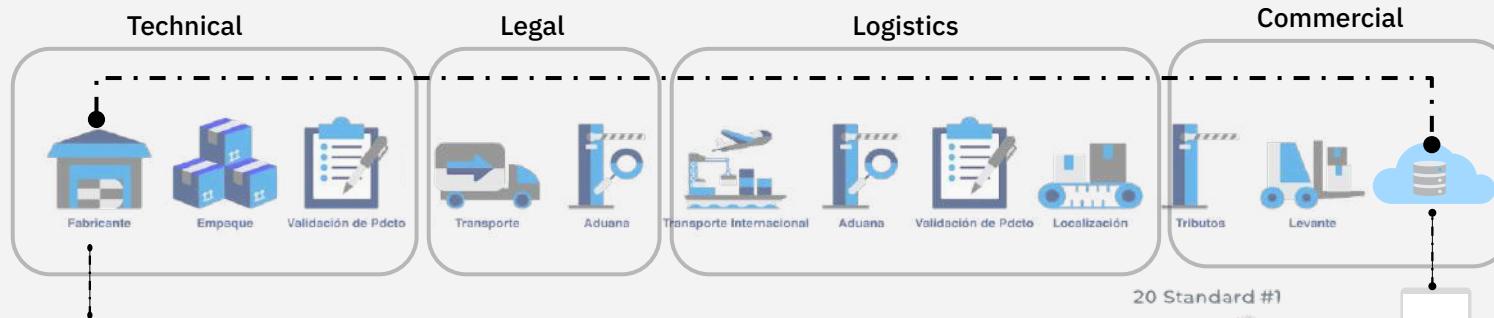

Raw Material Sourcing: Stage transforms of fabrics. Spinning yarns. Weaving or knitting fabrics. Design and Product Development: Creating clothing and accessory designs.

Our Services - 4 Party Logistics

Focus on international trading, **Acceso International** (By SG Master) methodology standardizes all distribution network through 4 modules: Each phase within the **technical, customs, logistic and commercial** areas make up a "Supply Chain Control Tower", something like a "central cockpit" where the central decisions about all the information that **integrates the business processes of the entire supply process** rest, allowing a quick management of international requirements, as well as unforeseen events or details.

This methodology develops specialized research for buyer/supplier directly and without intermediaries, establishing parameters of the commercial exchange according to negotiation power to decrease or increase up to 5% the value of the product.

This is supported by a Digital Platform powered to track and load containers empowered by AI and machine learning.

Our Services - Global Sourcing

By managing of Middle and Last-mile: depending on the characteristics of each logistics chain from customer, we can:

- **Production logistics chains (B2B):** source and build the last mile covering the supply of components that are part of a production process, for example, the delivery of parts or spare parts to the factory.
- **Distribution logistics directed to physical stores (B2B):** managing the last mile encompasses the stocking of physical stores, where products are made available for sale to customers.
- **Supply chains focused on the end consumer and the retail sector (B2C):** solution that involves delivery directly to the customer or to a pre-agreed location, typically resulting from an online store purchase. This segment attracts the most attention due to the logistical challenges it presents.

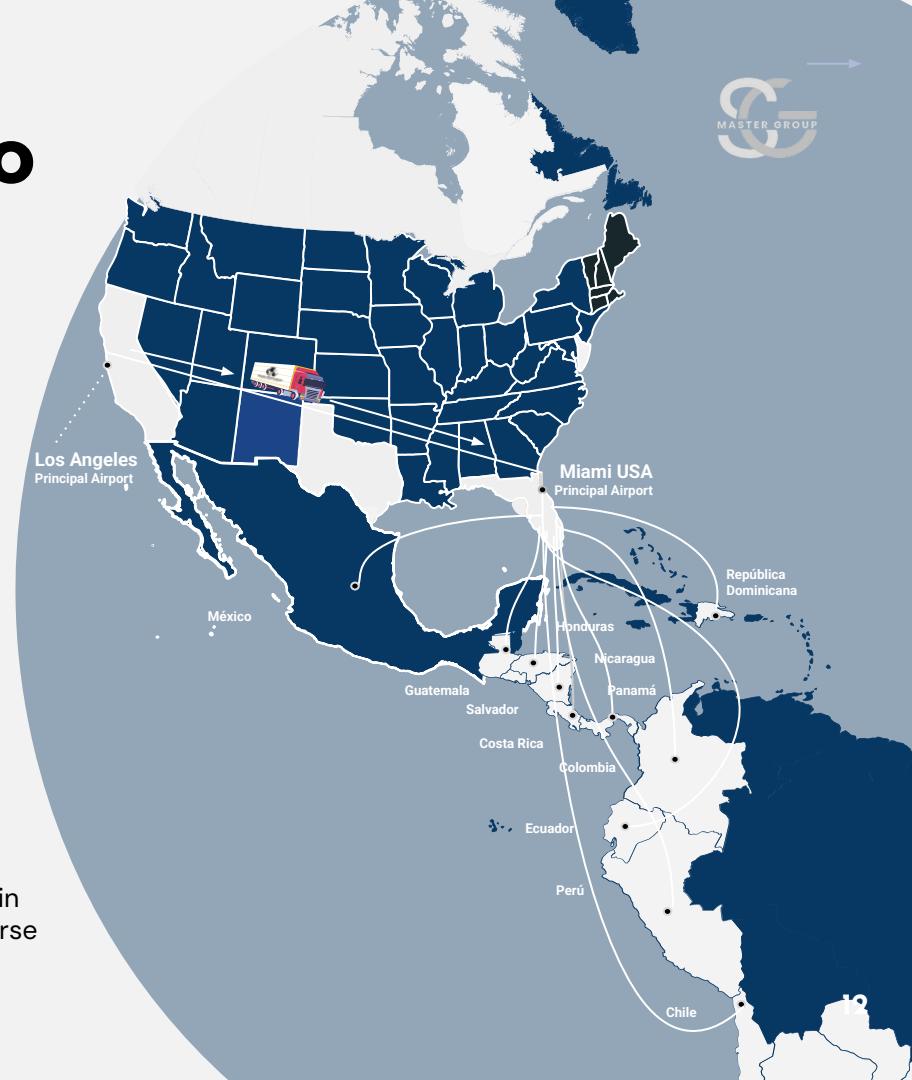

Middle Mile from USA to Latin America

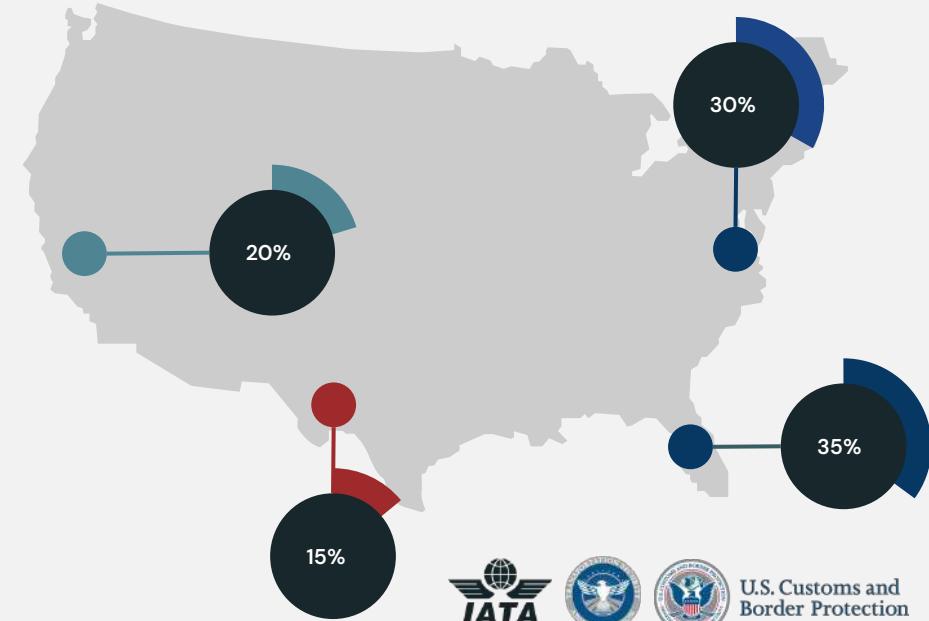

Country	Simple WH	Bonded WH	Customs Agency	IATA
USA	✓	✓	✓	✓
Guatemala	✓	✓	✓	✗
El Salvador	✓	✓	✓	✓
Honduras	✓	✓	✓	⌚
Nicaragua	✓	✓	✓	✗
Costa Rica	✓	✓	✓	✓

Ecuador	✓	✓	✓	✗

SG Master Group orchestrates seamless Middle Mile logistics from the United States to Latin America by integrating advanced supply chain methodologies with an extensive network of strategic partners. We leverage **data-driven route optimization and real-time risk management** to ensure cost-effective, reliable transport, while our **comprehensive customs expertise streamlines cross-border operations** for multinational clients.

This holistic approach mitigates complexity, secures on-time deliveries, and helps clients maintain competitive advantage across diverse Latin American markets.

USA Facilities and Distribution

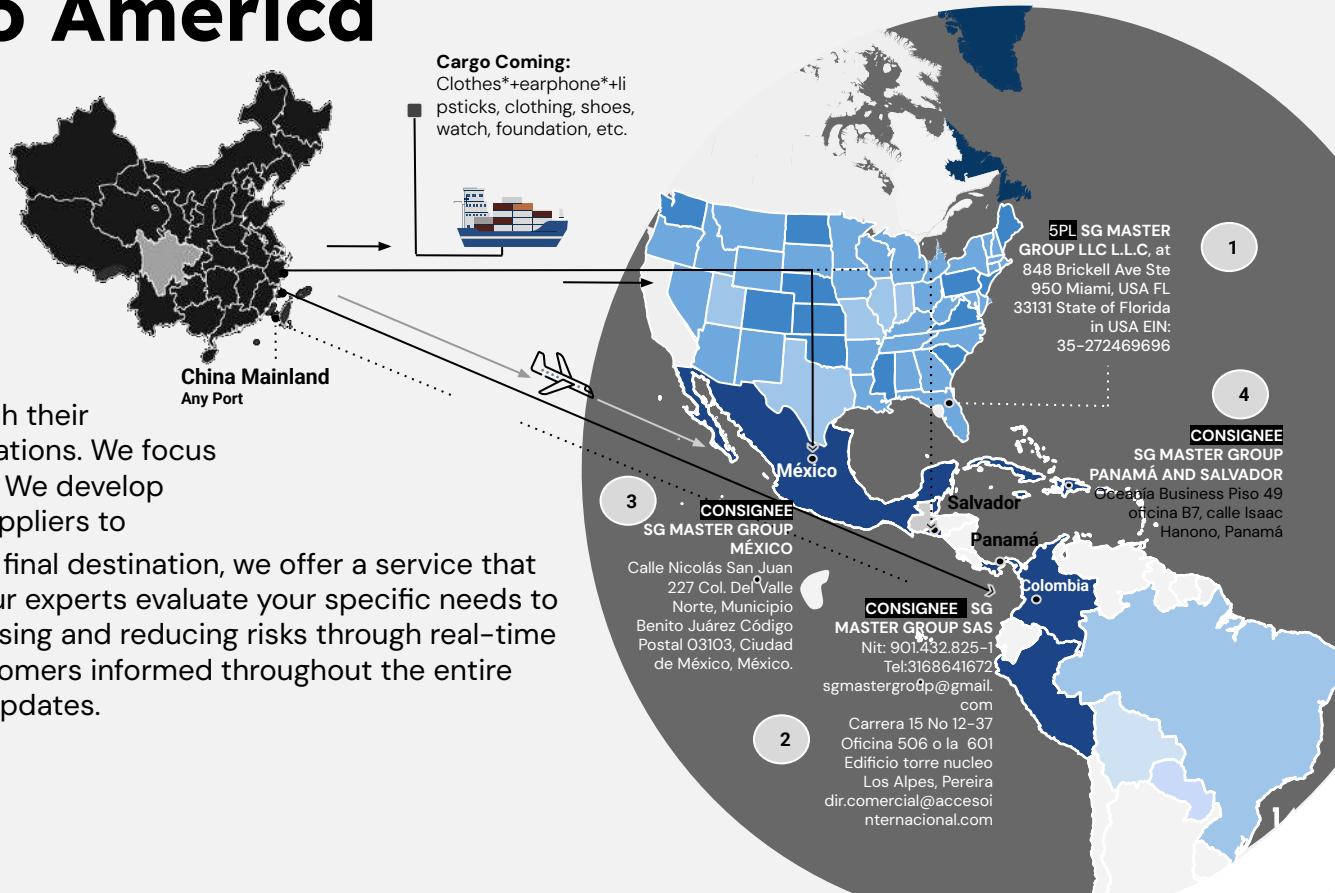

Worldwide sourcing from The world to America

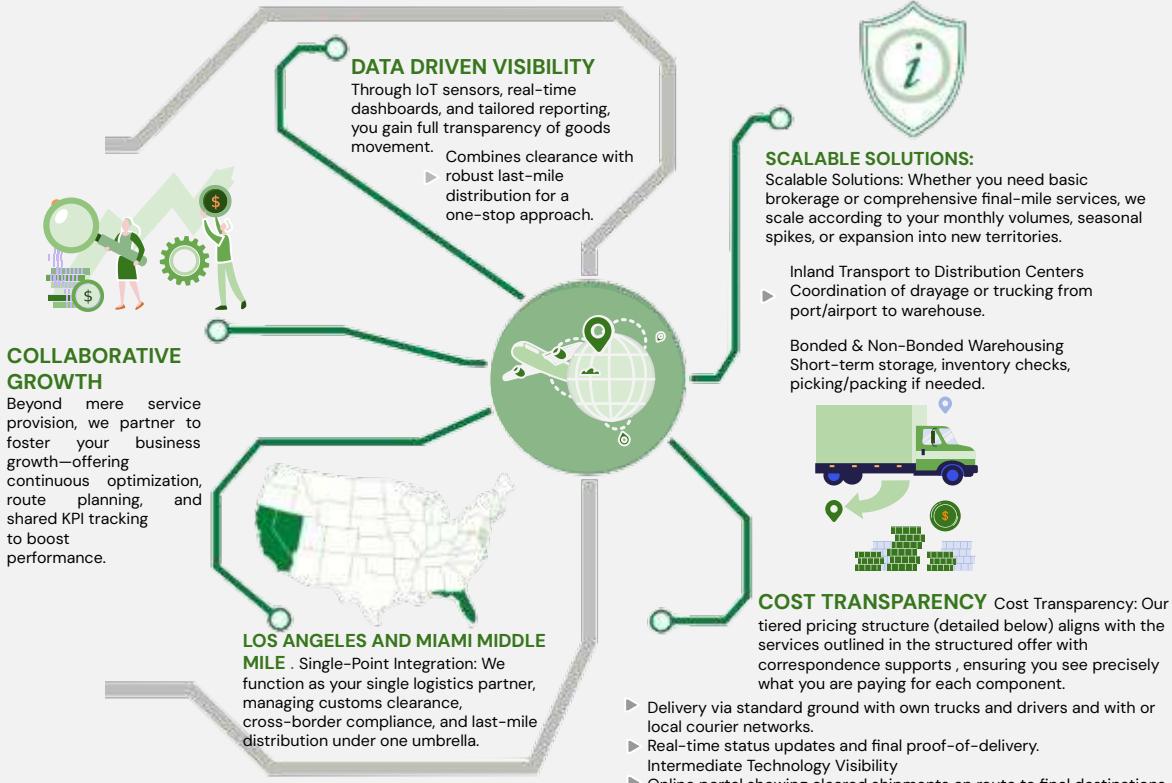

We have specialized in international sales and purchasing management. Facilitating access to global markets, we comply with all international and local laws and regulations

to ensure that your products reach their destination without legal complications. We focus our operations on cost efficiency. We develop operations from the search for suppliers to

the delivery of the product at the final destination, we offer a service that covers the entire supply chain. Our experts evaluate your specific needs to offer tailor-made solutions, assessing and reducing risks through real-time monitoring and keeping your customers informed throughout the entire shipping process with real-time updates.

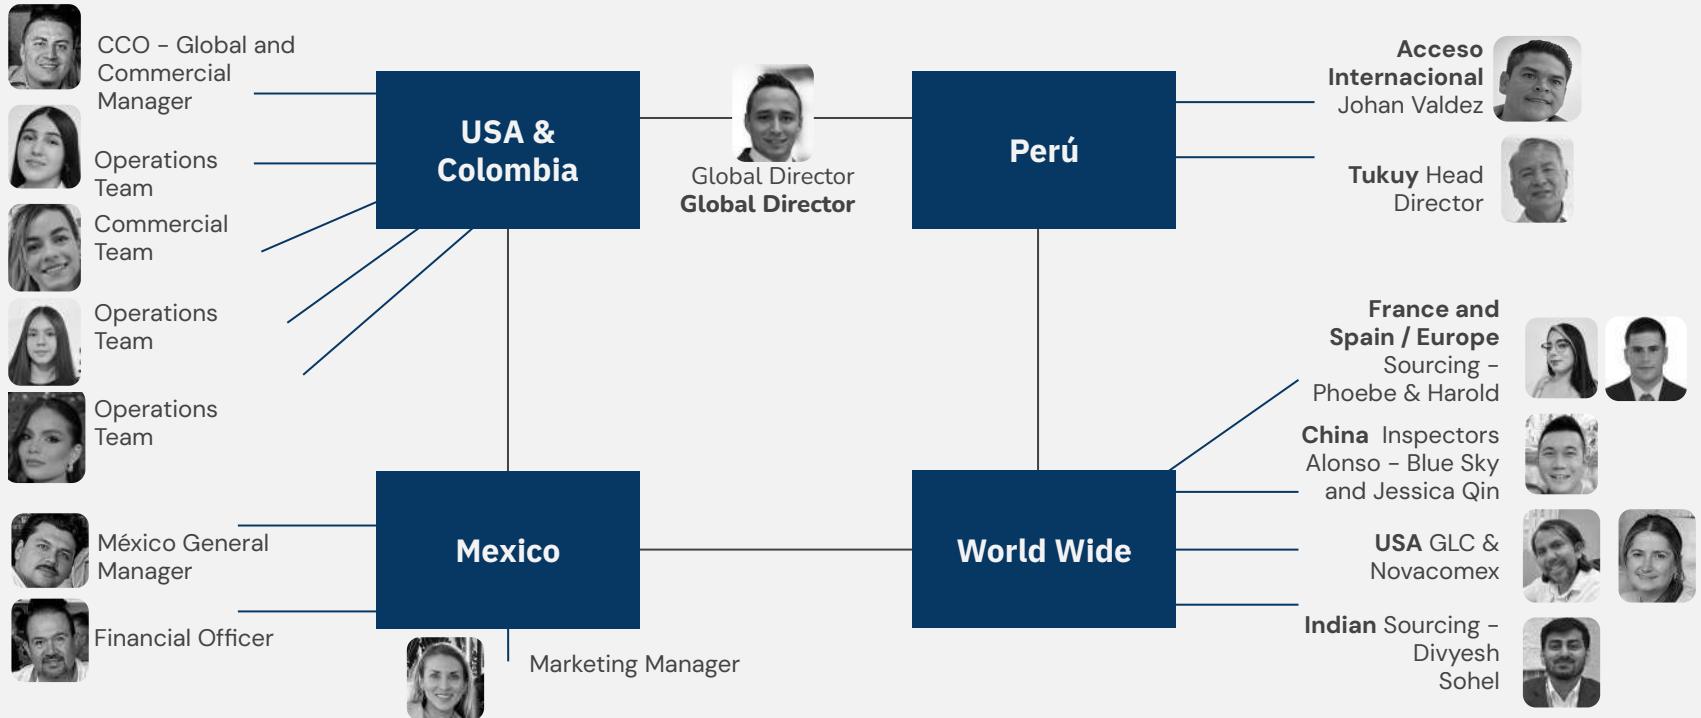

Corporate Strategy

Our supply chain consolidation network is designed to improve the service level and outbound logistics cost of large global commerce players and e-commerce retailers like Aliexpress, Shein, Tiktok Shop and TEMU.

Specifically, we considered planning the problem of capacity per destiny for moving customer shipments from fixed stocking locations to Last Mile Delivery partners at minimum cost while satisfying customer promised delivery times
